

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph on page 4, lines 26-32 with the following:

That object is further attained by a post-shapeable wood material body which has one or more layers of strands wetted with a binding agent system ~~as set forth in claim 12~~, wherein the binding agent system has a first thermosettingly curing binding agent and a second thermosettingly hardening agent which cures at higher temperature and/or pressure conditions than the first thermosetting binding agent and the first thermosettingly curing binding agent is present in the post-shapeable wood material body not in complete but in only partially cured form.

Please replace the paragraph on page 5, lines 1-10 with the following:

That object is further attained by a wood material body having one or more layers of strands wetted with a binding agent system ~~as set forth in claim 13~~, wherein the binding agent system contains a combination of a first thermosettingly curing binding agent and a second thermosettingly curing binding agent, wherein the second thermosettingly curing binding agent cures at higher temperatures and pressures than the first thermosettingly curing binding agent, wherein the first and the second thermosettingly hardening binding agent are finally cured at the higher temperatures and pressures or the binding agent system comprises a combination of a first thermosettingly hardened binding agent and a natural adhesive, in particular based on protein- and/or starch-bearing products.

Please replace the paragraph on page 5, lines 11-13 with the following:

That object is further attained by processes for the production of such wood material bodies ~~as set forth in claim 2~~ and such post-shapeable wood material bodies ~~as set~~

~~forth in claim 3~~ having one or more layers of strands wetted with a binding agent system.

Please delete the paragraph on page 6, lines 24-25.
